Effective Components	Ineffective Components	Ways to Improve
<p>What parts work well in successfully bringing about positive change? Why?</p> <ul style="list-style-type: none"> - Promotes education by helping children in need at school - Allows students in need to have food meals for over the weekend while they aren't at school - Lets children know that their school cares about them - Sneeds light to the need to help children in poverty - Supplies 3 meals for kids on the weekends 	<p>Where does the solution fall short? What limits its ability to successfully improve the problem? Why?</p> <ul style="list-style-type: none"> - In some schools there is a higher demand for food - Not ALL schools in the U.S has programs like this - Only some students can get the food and in some schools there are even waiting lists - The students only get food for weekends and not all week for after school at home - The kids aren't in school in the summer so they won't get food - It can cause bullying at older ages 	<p>How could this solution be modified, transformed, replaced, or made better in any way?</p> <ul style="list-style-type: none"> - make it available to every kid in need - give students food for after school - make programs like this available to any school that has children who need it - find out other ways to help children - programs in touch

Super example + great example of your thinking with skills!
