

# MYP Global Context Grant

Completely logical connection + thoroughly explained *Bravo*

1) Circle the global context that you are selecting

- ★ Scientific & Technical Innovation
- ★ Globalization & Sustainability
- ★ Fairness & Development

2) Why is this the "lens" through which you want to design your solution?

Because my problem - LGBTQ+ issues - can literally connect to every bullet point under fairness and development. It's all about relationships and understanding.

3) What connections can you make between your global context and:

The Problem	Existing Solutions	Your Thoughts, Feelings, Beliefs on the Topic
<ul style="list-style-type: none"> <li>• LGBTQ+ try to imagine a hopeful future even with the ignorant people and discrimination in the world</li> <li>• end the conflict and misunderstandings that most heterosexual people have towards LGBTQ+ individuals, and make things more peaceful</li> <li>• LGBTQ+ couples do not have the same privileges as straight couples</li> </ul>	<ul style="list-style-type: none"> <li>• access to equal opportunities connects to non-bis and non-homosexual work policies</li> <li>• rights and laws connects to countries/states making gay marriage legal or illegal</li> <li>• responsibilities relates to people who think they have a responsibility to educate others about LGBTQ+</li> </ul>	<p>Fairness and development is about creating strong relationships between communities and people, and treating those people equally without barring them from security, freedom, and choices that others get to make. Right now, not everyone in the LGBTQ+ is being included and treated with respect.</p>

I agree with this stuff - it pretty much guides my life. People deserve respect unless their behavior shows otherwise.

4) Why do you believe this global context the "best fit" for you project?

what I wrote under the third column directly connects to this question. LGBTQ+ people are not getting the respect and fairness they deserve as humans.

(5)
