

Step Two Directions:

> Use the following resources to help you create a set of success criteria for the design of your website:

- your design brief
- the resources on our class website on the UNIT 3: Shark Tank page under the project calendar (i.e. Web Design Resources).

> Questions to consider when looking at those sheets and evaluating the needs of your solution:

- What components will you need to...
- What components will you need...
- How will you organize your w...ts?
- What kind of organizational...ain the problem,
- explain why your clients...nably do?
- What components of e...

Design Specification for the: **Website**

My website must:

- speak for me.
- explain why this is an issue.
- tell what people are doing already to (partially) solve the issue.
- have statistics.
- explain future ramifications of wasting or not wasting water.
- be appealing to the eye. (easy to look at/keep attention/but don't be distracting)
- be powerful and move people to do something
- have links to other helpful sites
- Not too much writing
- FAQ page with way to contact me
- have surveys to collect data and trivia that will shock people
- provide water saving tips/advice

*PLEASE ATTACH ADDITIONAL SHEETS OF PAPER IF MORE SUCCESS CRITERIA IS NEEDED FOR EITHER DESIGN SPECIFICATION.
