

## Step Two Directions:

> Use the following resources to help you create a set of success criteria for the design of your website:

- your design brief
- the resources on our class website on the UNIT 3: Shark Tank page under the project calendar (i.e. Web Design Resources).

> Questions to consider when looking at... evaluating the needs of your solution:

- What components will you...
- What components will you...
- How will you organize your...
- What kind of organizational... explain why your clients should... reasonably do?
- What components of effective... ed?

**EXCELLENT...**  
exemplary...  
both sets of success  
criteria. May I  
use as an example?

Design Specification for the: <b>Website</b>
My website must:
<input type="checkbox"/> speak for me
<input type="checkbox"/> include organized, category based information tabs
<input type="checkbox"/> provide sources and data relating to problem
<input type="checkbox"/> bright and colorful : attractive to the eye (Lasta isn't a glossy topic)
<input type="checkbox"/> must contain a page filled with websites/sources I referenced
<input type="checkbox"/> organized in an order that leads from one thing to the next, based on what people need to know first in order to understand things down the line
<input type="checkbox"/> be clear so people aren't confused after they read something I wrote
<input type="checkbox"/> include a FAQ page with an email I created that's specifically for the site
<input type="checkbox"/> don't just have huge P's of text - have some pictures and art
<input type="checkbox"/> must be powerful and move people
<input type="checkbox"/> Must have a "drop the mic" ending factor

↳ it's a nice, informative topic  
line  
(that are sourced)  
at

\*PLEASE ATTACH ADDITIONAL SHEETS OF PAPER IF MORE SUCCESS CRITERIA IS NEEDED FOR EITHER DESIGN SPECIFICATION.
